**ANNUAL
REVIEW
OF
BUSINESS CONDITIONS
ALBERTA
1964**

PREPARED BY ALBERTA BUREAU OF STATISTICS,
DEPARTMENT OF INDUSTRY AND DEVELOPMENT,
EDMONTON - ALBERTA.
APRIL 5, 1965.

By year end it was universally recognized that 1964 had been an exceptionally prosperous year. As 1964 began, there had been some reservations as to prospects for the construction industry and therefore automatically for the large segment of the labour force engaged in that industry. The surge of investment in the mining (oil and gas) industry, coupled with the abnormal and unprecedented sales and movement of wheat to China and Russia infused and diffused a wave of cash and credit throughout the prairie economy. This had the effect of stimulating all industries, including the construction industry, to new records.

On the national basis, the currency revaluation of 1962 has proven to be the most significant factor in the growth of exports. Both primary and manufactured products were given a needed edge in international markets. The previous strength or over-valuation of the Canadian dollar, while good for Canadian ego, was caused by the continuous, welcome, heavy influx of American investment capital. American investors are now more than ever in a preferred position, but Canadian exports no longer have to seek markets under an unjustified and artificial handicap. The industrial and commercial expansion in Canada which was stimulated by increased domestic prosperity and increased exports has resulted, as well, in a marked increase in imports of all types. On balance, the Canadian economy has certainly benefitted.

It is expected that generally favourable economic conditions will obtain in Alberta throughout 1965. Two reservations may be noted. There will be no recurrence of the additional incremental farm cash income such as followed the 1963/64 grain sales to Russia and China; sales will only be at their "normal" level. It follows that the surge of spending and the surge of opti-

mism which swept through the western Canadian (and Canadian) economy during 1964 will not be repeated and that the commercial community generally will only feel the impact of normal general economic growth.

Secondly, there are growing indications of reactions to imports generally in Canadian export markets. Neither the European Common Market, nor the United Kingdom, nor the U.S.A. have welcome mats out for those products which they can either manufacture or produce. Resistance to large scale imports quite clearly is building up, due to various internal pressures. How soon these pressures will prove effective in making access difficult to these markets it is hard to say; probably first one and then another commodity will be affected. It is becoming gradually apparent that, the world over, domestic markets increasingly are going to be reserved for domestic producers.

Employment was high during 1964, utilizing the available labour force to the full. Fortunately there was little repetition of 1956 conditions when the labour shortage had an inflationary effect. Labour income rose in line with fuller employment.

Specifically for Alberta, the outlook for 1965 is very favourable. Development of natural resources will continue at a record rate. An increase in mineral production, largely from natural gas sales, should be noted. Several large new manufacturing plants, and several major plant expansions which took place during 1964, first come into full production during 1965. There should be, accordingly, a substantial increase in manufacturing output. The construction industry showed surprising strength as 1964 wore on. Most major projects are carrying over and will supplement the effects of the new 1965 undertakings being announced. Of the major industries, only agriculture will be adversely situated. The abnormal

grain sales of 1963/64 will not be repeated. There will be a sharp drop in farm cash income from grain sales which some recovery in livestock prices will not offset. The effect of lower farm cash income is bound to be felt by the commercial community.

Nevertheless, with three of the four major industries approaching new records, Albertans can expect to maintain the pace of economic development set during the past few years.

AGRICULTURE ==

Farmers' cash income from grain shipments was over \$85 million higher than in 1963, with the major increases coming from wheat and barley. Income from livestock sales was also \$11 million higher, but only because a substantial rise in numbers marketed more than offset lower prices. There was a 3% rise in income of dairy farmers and a 4% decline in income from poultry products.

FARM CASH INCOME FROM MAJOR SOURCES - ALBERTA 1962, 1963 and 1964

	<u>1 9 6 2</u>	<u>1 9 6 3</u>	<u>1 9 6 4</u> (Preliminary)
	\$	\$	\$
Grain (Including Supplementary payments)	207,749,000	190,188,000	275,490,000
Livestock	243,509,000	220,232,000	231,396,000

Poultry Products	10,094,000	11,773,000	11,278,000
 TOTAL	 502,442,000	 461,793,000	 559,109,000

MINERALS

The value of minerals sold rose from \$669 million to \$747 million, an increase of nearly 12%. Alberta is the second largest mineral producing province and now accounts for slightly over one-fifth of Canada's total mineral production.

Sales of structural materials increased by 7% while those of fuels and non-metallic minerals increased by 12% and 26% respectively. The major increases were in sales of sulphur (up \$3 million) condensates (up \$4 million) natural gas (up \$33 million) and crude oil (up \$35 million).

MANUFACTURING --

The value of manufacturers shipments rose by nearly 10%, to a total of \$1,134 million. Major increases were recorded by foods and beverages producers (up \$44 million), by wood product processors (up \$10 million), by the metal fabricators and producers (up \$25 million).

The major manufacturing firms of the province were asked for a comparison of 1964/63 value of products shipped. Out of 120 replies, eighty-eight percent reported increases ranging from several thousand to several million dollars. Twelve percent reported a lower sales volume. The decreases were concentrated mainly in the machinery and transportation industries.

The overall outlook for Alberta industries in 1965 will continue to be very favourable.

CONSTRUCTION --

Activity in the construction industry increased by 3% over 1963. The estimated value of building permits issued totalled \$290 million as compared with \$280 million. Among the cities -- Calgary, Edmonton, Camrose and Lloydminster exceeded the 1963 building volume by a comfortable margin. Building volume in the 10 cities increased by nearly 5% to \$226 million; that of the rural centres decreased by an estimated 2% to \$65 million.
